Zurich, Switzerland 8050
Leutschenbachstrasse 30

WORK EXPERIENCE

DFINITY Stiftung **Zurich, Switzerland**
Site Reliability Engineer / Software Engineer ***Sep 2022 – Present***

- Developed service discovery component for enumerating machines across environments; enabled querying, monitoring, and faster development workflows. **Stack**: Rust, Docker, Python, Bazel, Kubernetes.
- Built core log fetching infrastructure for multiple environments and scales; deployed as aggregated service relied upon company-wide for network visibility. **Stack**: Rust, Python, Docker, Bazel, Kubernetes, Kibana, Elasticsearch, Vector.dev.
- Created community-facing tooling for network interaction used daily. **Stack**: Python, Rust, Golang.
- Reduced observability costs by migrating from cloud-managed to on-premise Kubernetes clusters. Stack: AWS, GCP, On-prem Kubernetes.
- Automated release processes via release controller, enabling weekly releases. **Stack**: Apache Airflow, Python, Kubernetes.
- Built oncall duty management utility, reducing scheduling overhead and post-mortem meeting time. **Stack**: Jira Service Management, OpsGenie, Pagerduty, Python.
- Automated observability in system tests used by all developers. **Stack**: Grafana, Prometheus, VictoriaMetrics, Vector, Rust, Golang.
- Developed small-scale observability platform deployable on Raspberry Pi devices for node providers. **Stack**: Ansible, Python, Vagrant.
- Created network composition tool enabling community and internal engineers to simulate network topologies given complex requirements using Linear Optimization. **Stack**: Python.
- Contributed to critical canisters including Registry canister (network information) and Node rewards canister (provider payments). **Stack**: Rust.
- Implemented disaster recovery strategies for network restoration. **Stack**: Rust, Python, AWS, Cloudflare R2.
- Developed testing drivers used across teams for quality assurance. **Stack**: Haskell, Rust, Golang, Bazel.
- Implemented node replacement and operator migration features, reducing operation time from days to minutes with great security improvements. **Stack**: Rust.
- Assisted with NNS recovery implementation, designing process orchestration components for network resilience. **Stack**: Rust.

Sotex Solutions (outsourced to Schneider Electric Seville) **Novi Sad, Serbia**
Fullstack Software Engineer ***May 2021 – Sept 2022***

- Developed microservices handling high-volume event processing, aggregation, and near real-time billing. **Stack**: .NET, MSSQL, Docker, Kubernetes, NServiceBus.
- Built fully automated environment deployment pipelines with Terraform. **Stack**: Terraform, GitHub Actions, Azure DevOps.
- Refactored codebase for Docker adoption and repeatable deployments. **Stack**: .NET, Docker, MSSQL, Kafka.
- Improved developer onboarding for frequently rotating teams. **Stack**: Bash, Docker, Azure Entra.
- Collaborated with Solution Architect on scalability planning and architecture transitions.

Sotex Box **Novi Sad, Serbia**
Founding Engineer ***May 2021 – Sept 2022***

- Built ad delivery platform for low-bandwidth networks in Serbia; served 10k simultaneous devices on $40/month budget, generating ~$5,000/month revenue.
- Executed all roles from architecture through development, DevOps, sales, and marketing. **Stack**: .NET, Postgres, AWS, Pulumi, Flutter.

EDUCATION

Faculty of Technical Sciences **Novi Sad, Serbia**
Bachelor's and Master's Degrees ***Sept 2018 – Dec 2023***

- Bachelor's GPA: 9.49/10, Master's GPA: 9.75/10
- Worked as a teaching assistant during the last year of Bachelor's and Master's. Was involved with cyber security and microservice architectures.

ADDITIONAL INFORMATION

Languages:	Advanced English (C1 Cambridge degree), Native Serbian.
Programming languages:	Rust, Python, Golang, .NET (willing to learn more)
Cloud & Infrastructure:	AWS, GCP, Azure, Kubernetes, Docker
CI/CD & Automation:	Github Actions, Azure DevOps, Apache Airflow, Bazel
AI:	Heavily utilizing Opencode with Gemini and Claude Opus
Interests:	Gym, Soccer, Tennis, Leetcode, NeoVim, AI, Opencode
Work authorization:	Authorized to work in Switzerland (B Permit) and Serbia, open to relocation
